

NovaTech Enterprise Data & AI Market Report 2026

Synthetic market-intelligence report for controlled Enterprise AI demonstration.

Executive Summary

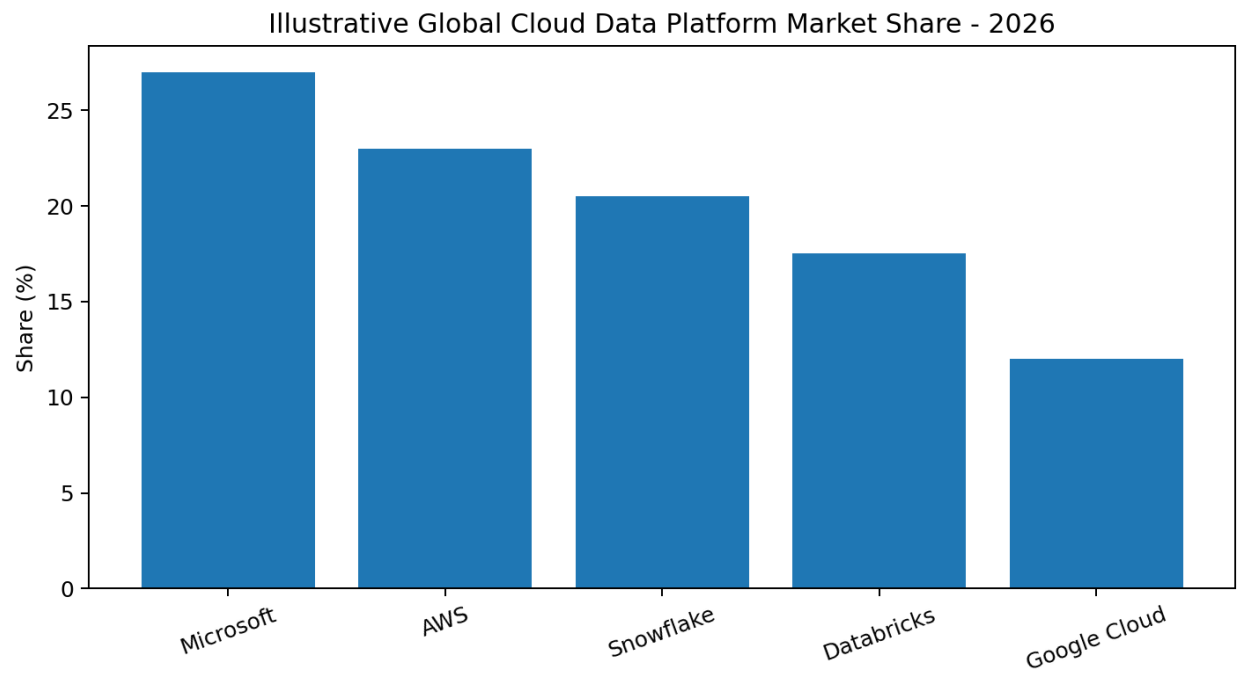

The 2026 illustrative dataset shows Snowflake at 20.5% global share, up 4.5 percentage points from 2024. NovaTech attributes the gain to governed enterprise AI adoption, integrated hybrid retrieval, data sharing, and reduced orchestration complexity.

Vendor	2026 Share (%)
Microsoft	27.0
AWS	23.0
Snowflake	20.5
Databricks	17.5
Google Cloud	12.0

Market Drivers

- Governance-first AI adoption is moving from pilot to production.
- Hybrid retrieval is valued when semantic intent and exact enterprise terminology must both be preserved.
- Buyers increasingly assess platform decisions across governance, AI integration, cost transparency, and interoperability.
- Snowflake momentum is strongest in governed enterprise knowledge and integrated data/AI scenarios.
- Databricks momentum is strongest in engineering-led AI/ML and lakehouse scenarios.

Illustrative Market Share Chart

Provenance note: the quantitative values in this report are synthetic. In a production knowledge platform, the same metadata model would preserve source URL, publisher, reporting period, publication date, effective date, trust level, and access classification.

RAG Test Facts

- Latest reporting period in this document: 2026.
- Snowflake illustrative market share: 20.5%.
- Snowflake share change since 2024: +4.5 percentage points.
- Primary stated growth factors: governance, native AI/search, data sharing, lower integration complexity.
